SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking **1.1 Product identifier** Product name **Castrol React SRF Racing** 467286-GB13 **Product code** SDS no. 467286 **Product type** Liquid. 1.2 Relevant identified uses of the substance or mixture and uses advised against Use of the Brake fluids. For specific application advice see appropriate Technical Data Sheet or consult our company substance/mixture representative. 1.3 Details of the supplier of the safety data sheet **BP** Europa SE Supplier Max-Born-Strasse 2 D-22761 Hamburg Germany Customer Service Center / Environmental Protection / Product Safety: +49 (0)40 3594-01 E-mail address MSDSadvice@bp.com 1.4 Emergency telephone number EMERGENCY Carechem:+44 (0) 1235 239 670 (24 hours) **TELEPHONE NUMBER SECTION 2: Hazards identification** 2.1 Classification of the substance or mixture **Product definition** Mixture Classification according to Directive 1999/45/EC [DPD] The product is not classified as dangerous according to Directive 1999/45/EC and its amendments. See sections 11 and 12 for more detailed information on health effects and symptoms and environmental hazards. 2.2 Label elements **Risk phrases** This product is not classified according to EU legislation. Safety phrases Not applicable. Supplemental label Contains N-alkylated benzotriazoles, (Isomers - mixture). May produce an allergic reaction. elements Special packaging requirements Containers to be fitted Not applicable with child-resistant fastenings Tactile warning of danger Not applicable 2.3 Other hazards SECTION 3: Composition/information on ingredients Mixture Substance/mixture Polyalkylene glycol ethers / glycols Classification **Product/ingredient** Identifiers % 67/548/EEC Regulation (EC) No. Туре 1272/2008 [CLP] name triethylene glycol EC: 203-953-2 5-10 Not classified. Eye Irrit. 2, H319 [2] CAS: 112-27-6 See Section 16 for the full text of the H statements declared above. Type [1] Substance classified with a health or environmental hazard [2] Substance with a workplace exposure limit [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII Occupational exposure limits, if available, are listed in Section 8.

Product name	Castrol React SRF Racing	Product code 46728	36-GB13	Page: 1/7
Version 1	Date of issue 31 March 2011	Format Germany	Language	ENGLISH
		(Germany)		

SECTION 4: First aid measures

4.1 Description of first aid me	asures
Eye contact	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Skin contact	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if irritation develops.
Inhalation	If inhaled, remove to fresh air. Get medical attention if symptoms appear.
Ingestion	Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training.

4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician Treatment should in general be symptomatic and directed to relieving any effects.

SECTION 5: Firefighting measures

	-		
5.1 Extinguishing media			
Suitable extinguishing media	In case of fire, use water fog, alcohol resistant foam, dry chemical or carbon dioxide extinguisher or spray.		
Unsuitable extinguishing media	Do not use water jet.		
5.2 Special hazards arising from	m the substance or mixture		
Hazards from the In a fire or if heated, a pressure increase will occur and the container may burst. substance or mixture			
Hazardous combustion products	Combustion products may include the following: carbon oxides (CO, CO ₂) (carbon monoxide, carbon dioxide) metal oxide/oxides		
5.3 Advice for firefighters			
Special precautions for fire- fighters	No action shall be taken involving any personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.		
Special protective equipment for fire-fighters Exercise the should wear appropriate protective equipment and self-contained breathing (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighter (including helmets, protective boots and gloves) conforming to European standard EN 4 provide a basic level of protection for chemical incidents.			

SECTION 6: Accidental release measures

ective equipment and emergency procedures
No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Floors may be slippery; use care to avoid falling. Put on appropriate personal protective equipment.
If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
containment and cleaning up
Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal contrainer. Dispose of via a licensed waste disposal contractor.
Immediately contact emergency personnel. Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor.
See Section 1 for emergency contact information.
See Section 5 for firefighting measures.
See Section 8 for information on appropriate personal protective equipment. See Section 12 for environmental precautions.
See Section 12 for additional waste treatment information.

forms to Regulation (EC) No. 1907/2006 (REACH). Annex II

SECTION 7: Handling a	and storage			
7.1 Precautions for safe handling				
Protective measures	Put on appropriate personal protective equipment (see Section 8).			
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Wash thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.			
7.2 Conditions for safe storage, including any incompatibilities	Store and use only in equipment/containers designed for use with this product. Keep away from heat and direct sunlight. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10).			
Not suitable	Hygroscopic. Keep container tightly closed.			
7.3 Specific end use(s) Recommendations	See section 1.2 and Exposure scenarios in annex, if applicable.			
	controls/personal protection			
8.1 Control parameters				
Occupational exposure limits				
Product/ingredien	t name Exposure limit values			
triethylene glycol	TRGS900 AGW (Germany). PEAK: 2000 mg/m³ 15 minute(s). Issued/Revised: 7/2008 Form: inhalable			
	fraction TWA: 1000 mg/m³ 8 hour(s). Issued/Revised: 7/2008 Form: inhalable fraction			
	components may be shown in this section, other components may be present in any mist, vapour c			
dust produced. Therefore, the sp Recommended monitoring procedures	specific OELs may not be applicable to the product as a whole and are provided for guidance only. If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to European Standard EN 689 for methods for the assessment of exposure by inhalation to chemical agents and national guidance documents for methods for the determination of			
Derived No Effect Level No DELs available.	hazardous substances.			
Predicted No Effect Concentrat No PNEC available.	ion			
8.2 Exposure controls				
Appropriate engineering controls	Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapours below their respective occupational exposure limits. All activities involving chemicals should be assessed for their risks to health, to ensure exposures are adequately controlled. Personal protective equipment should only be considered after other forms of control measures (e.g. engineering controls) have been suitably evaluated. Personal protective equipment should conform to appropriate standards, be suitable for use, be kept in goo condition and properly maintained. Your supplier of personal protective equipment should be consulted for advice on selection and appropriate standards. For further information contact your national organisation for standards. The final choice of protective equipment will depend upon a risk assessment. It is important to ensure that all items of personal protective equipment are compatible.			
Individual protection measures				
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Ensure that eyewash stations and safety showers are close to the workstation location.			
Respiratory protection	Respiratory protective equipment is not normally required where there is adequate natural or local exhaust ventilation to control exposure. In case of insufficient ventilation, wear suitable respiratory equipment. The correct choice of respiratory protection depends upon the chemicals being handled, the conditions of work and use, and the condition of the respiratory equipment. Safety procedures should be developed for each intended application. Respiratory protection equipment should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.			
Eye/face protection	Safety glasses with side shields.			
Skin protection				
Hand protection	Wear protective gloves if prolonged or repeated contact is likely. Wear chemical resistant gloves. Recommended: Butyl gloves. Neoprene gloves. The correct choice of protective gloves depends upon the chemicals being handled, the condition of work and use, and the condition of the gloves (even the best chemically resistant glove will			

The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and with a full expedience of the working expeditions. assessment of the working conditions.

Product name Castrol React SRF Racing			Product code 4672	86-GB13	Page: 3/7
Version 1	Date of issue 31 March 2011	Format	Germany	Language	ENGLISH
			(Germany)		

SECTION 8: Exposure controls/personal protection

Skin and body	Use of protective clothing is good industrial practice. Cotton or polyester/cotton overalls will only provide protection against light superficial contamination that will not soak through to the skin. Overalls should be laundered on a regular basis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emission to acceptable levels.

SECTION 9: Physical and chemical properties

-	
9.1 Information on basic physical	and chemical properties
Appearance	
Physical state	Liquid.
Colour	Amber.
Odour	Not available.
Odour threshold	Not available.
рН	9 to 10
Melting point/freezing point	Not available.
Initial boiling point and boiling range	Not available.
Flash point	Not available.
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or explosive limits	Not available.
Vapour pressure	Not available.
Vapour density	Not available.
Relative density	1.058
Solubility(ies)	Miscible in water.
Partition coefficient: n- octanol/water	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Explosive properties	Not available.
Oxidising properties	Not available.

9.2 Other information

No additional information.

SECTION 10: Stability and reactivity

10.1 Reactivity	No specific test data available for this product. Refer to Conditions to avoid and Incompatible materials for additional information.
10.2 Chemical stability	The product is stable.
10.3 Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous polymerisation will not occur. Under normal conditions of storage and use, hazardous reactions will not occur.
10.4 Conditions to avoid	No specific data.
10.5 Incompatible materials	Miscible in water. Strong oxidising materials. Incompatible with some strong acids. Do not use in brake systems requiring mineral oil. On contact these fluids will soften and may lift industrial coatings and paints.
10.6 Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological information

Information on the likely routes of exposure	Routes of entry anticipated:Dermal, Inhalation.
Potential acute health effects	<u>1</u>
Inhalation	Vapour inhalation under ambient conditions is not normally a problem due to low vapour pressure
Ingestion	No known significant effects or critical hazards.
Skin contact	No known significant effects or critical hazards.
Eye contact	No known significant effects or critical hazards.

Product name	Castrol React SRF Racing		Product code	467286-GB13	Page: 4/7
Version 1	Date of issue 31 March 2011	Format	Germany	Language	ENGLISH
			(Germany)		

SECTION 11: Toxicological information

Inhalation	May be harmful by inhalation if exposure to vapour, mists or fumes resulting from thermal decomposition products occurs.	
Ingestion	No specific data.	
Skin contact	No specific data.	
Eye contact	No specific data.	
Delayed and immediate effe	ects and also chronic effects from short and long term exposure	
Inhalation	Overexposure to the inhalation of airborne droplets or aerosols may cause irritation of the respiratory tract.	
Ingestion	Ingestion of large quantities may cause nausea and diarrhoea.	
Skin contact	Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis.	
Eye contact	Potential risk of transient stinging or redness if accidental eye contact occurs.	
Potential chronic health effe	ects	
General	No known significant effects or critical hazards.	
Carcinogenicity	No known significant effects or critical hazards.	
Mutagenicity	No known significant effects or critical hazards.	
Developmental effects	No known significant effects or critical hazards.	
Fertility effects	No known significant effects or critical hazards.	

SECTION 12: Ecological information

12.1 Toxicity

Environmental hazards

Not classified as dangerous

12.2 Persistence and degradability

Biodegradable

12.3 Bioaccumulative potential

This product is not expected to bioaccumulate through food chains in the environment.

12.4 Mobility in soil	
Soil/water partition coefficient (K _{oc})	Not available.
Mobility	Spillages may penetrate the soil causing ground water contamination.

12.5 Results of PBT and vPvB assessment

PBT	Not applicable.
vPvB	Not applicable.

12.6 Other adverse effects

Other ecological information Miscible in water.

SECTION 13: Disposal considerations

13.1 Waste treatment methods <u>Product</u>	
Methods of disposal	The generation of waste should be avoided or minimised wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
Hazardous waste	Yes.

European waste catalogue (EWC)

Waste code	Waste designation	
16 01 13*	brake fluids	

However, deviation from the intended use and/or the presence of any potential contaminants may require an alternative waste disposal code to be assigned by the end user.

Packaging

 Methods of disposal
 Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations. Recycle, if possible.

 Special precautions
 This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Empty containers represent a fire hazard as they may contain flammable product residues and vapour. Never weld, solder or braze empty containers. Avoid

dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Notice to reader

All reasonably practicable steps have been taken to ensure this data sheet and the health, safety and environmental information contained in it is accurate as of the date specified below. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information in this data sheet.

The data and advice given apply when the product is sold for the stated application or applications. You should not use the product other than for the stated application or applications without seeking advice from us.

It is the user's obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. The BP Group shall not be responsible for any damage or injury resulting from use, other than the stated product use of the material, from any failure to adhere to recommendations, or from any hazards inherent in the nature of the material. Purchasers of the product for supply to a third party for use at work, have a duty to take all necessary steps to ensure that any person handling or using the product is provided with the information in this sheet. Employers have a duty to tell employees and others who may be affected of any hazards described in this sheet and of any precautions that should be taken.
