

## Bumper brackets – to fit DAF Trucks

Bumpers can be found on virtually all vehicles. They should absorb the impact energy in accidents and protect the vehicle and occupants from the consequences.

Even in supposedly low impact forces, the bumper or the bumper brackets may be damaged although no damage is visible from the outside. Therefore, the corresponding components should always be strictly checked after a crash and replaced if necessary.

febi offers the following bumper brackets for DAF vehicles. They are manufactured in-house at our production facilities in Ennepetal in accordance with strict requirements for material, precision and fitting safety.

febi no. 45170

left

to fit:  
DAF CF85 IV, XF95, XF105  
Repl. no. 1735 002

febi no. 45180

right

to fit:  
DAF CF85 IV, XF95, XF105  
Repl. no. 1735 003
