

Just two parts for nearly the whole vehicle parc!

Now available in the febi range:

Universal CV boot repair kits for cars and universal CV boot repair kits for LCVs and SUVs!

CV boot kit for cars febi no. 27730 with clamps and 90g of grease febi no. 02582

CV boot kit for LCVs / SUVs febi no. 27111 with clamps and 180g grease febi no. 02582

The CV boots come with removable collars (five and six respectively) and, therefore, cover nearly all common car and LCV / SUV models.

These universal steering rack gaiters can be fitted on both the inner and outer CV joints.

By using the correct tool, you can stretch the boots up to 10cm in diameter which allows quick and easy fitting. It is not necessary to completely remove the prop shaft and drive shaft!

This considerably reduces the fitting time and saves the customer money.

For quick and easy tensioning and cutting of the CV boot clamps we recommend the use of the KLANN clamp tools KL-0121-85 and KL-0121-86.

Ask your febi partner for febi bilstein spare parts!
All parts are also available on www.febi.com.
