

The alternative to OE!

Antifreeze (purple)

febi no. 37400 (1.5 litre)

febi no. 37401 (5 litre)

febi no. 37402 (60 litre)

Repl. No. G 012 A8G

febi 37400 is a state-of-the-art premium long-term antifreeze concentrate based on monoethylene glycol with cutting-edge OAT (Organic Additive Technology).

Because of its outstanding properties, febi 37400 exceeds the requirements of a large number of manufacturers and foreign standards.

febi antifreeze...

- can be used for all vehicles, both trucks and passenger cars
- corresponds to the new VW standard antifreeze G12 plus plus
- meets the requirements of MAN 324 type Si-OAT, Scania TB 1451 and MB 325.5 (000 989 28 25)
- is downwardly compatible and mixable with all other branded antifreeze agents available on the market
- offers outstanding corrosion protection and is particularly suitable for aluminium, silicon and magnesium alloys
- raises the boiling point of the radiator fluid
- has excellent thermal conductivity
- provides a high level of protection against limescale, acid and cavitation
- is highly compatible with gaskets and seals
- provides protection against freezing down to -36°C (with a recommended mixing ratio of 1:1 with water)
- promotes the longevity of moving parts such as water pumps, thermostats or heating valves

Other fluids in the febi bilstein range can be found in the febi 90451 fluids flyer!
