# Tip

## Control arm bearings

### Caution:

**Collar bearings were installed until August 1999. The installation of such bearings is not suitable any longer and they have since been replaced with slot bearings.**

Suitable for rear axles of the following series:

# BMW E 36, E 46, X 3

febi no. 14923

reference number 33 32 6 770 786

### Please observe during the installation:

The bearing and the eye of the control arm must be free of grease.  
Each replacement must be made in pairs!

### Another important fact:

Please mark the control arm eye in the outer centre prior to the installation of the slot bearing. When the bearing is pressed in make sure that one slot of the bearing corresponds to the marking of the control arm. Then, insert the bearing to a dimension of 2.5 mm.

Please ask your febi partner for spare parts by febi bilstein! You will also find all spare parts at [www.febi.com](http://www.febi.com).

Valid as of 2/06
