

HEAVY DUTY PRODUCT OVERVIEW

HEAVY COMMERCIAL VEHICLE PARTS

GO THE DISTANCE WITH GATES EXTRA SERVICE SYSTEMS SOLUTIONS

Unexpected breakdowns cause a considerable loss of time and high costs. In order to avoid unwanted delays, spare parts have to assure reliable and trouble-free performance. Gates' commercial vehicle programme is specially designed for trouble-free and long-lasting service in the demanding working conditions of trucks and buses. The products in this range are built to original equipment quality and offer excellent performance.

**The Gates Extra Service label
is a guarantee for top quality
and long service life.**

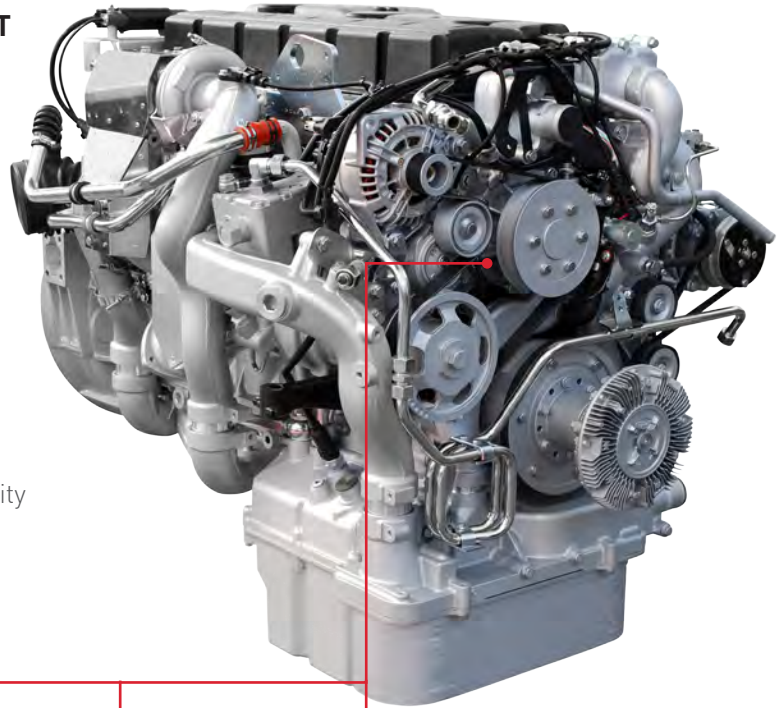

BELT DRIVE SYSTEMS

BETTER WHERE IT COUNTS THE MOST

Reliable Accessory Belt Drive Systems are crucial for heavy-duty engines to run trouble-free. With Gates you are sure to get high quality parts that last longer. Gates range includes Extra Service Micro-V® belts, V-belts, DriveAlign® tensioners and complete Micro-V® kits for a full overhaul of the system.

Your benefits

- › Largest product range offering the best market coverage
- › OE technology that leads to better reliability

EASY PRODUCT SEARCH

As an Aftermarket Specialist, Gates has the benefit over OES that the Gates Extra Service range excels in application coverage for multiple brands. All information can be found easily online at www.Gatesautocat.com. This user-friendly tool allows you to look up products, interchanges and view images of all our belt drive system parts for heavy commercial vehicles.

HOSES AND CONNECTORS

A VERSATILE HOSE RANGE TO FIT ALL NEEDS

Gates Extra Service range comprises a full programme of hoses for coolant, fuel and air. Many of our hoses offer excellent resistance to electrochemical degradation, heat, oil, abrasion, ozone and leakage. In addition, various lengths and sizes are available in order to offer you the best market coverage at the lowest stock keeping volumes.

Hose types	Description	Your benefits	
Coolant	Preformed	Curved hoses that fit the application perfectly	
Coolant	Straight & flexible	Straight & flexible connections allowing easy installation	
Coolant	Silicone	For peak performance in extremely high temperature conditions	
Fuel	Fuel Line	For regular fuels and bio fuels	
Fuel	Fuel Fill	For a perfect connection between filler neck and fuel tank	
Air & defroster	Defroster	Extremely flexible hose recommended for low-pressure or suction applications	
Air & defroster	Air Vent	High strength flexible hose for cleaner-to-engine applications	

In addition to a large range of hoses, Gates offers all necessary connectors. Using straight, elbow, reducer, "T" and "Y" shapes, almost any hose configuration can be constructed.

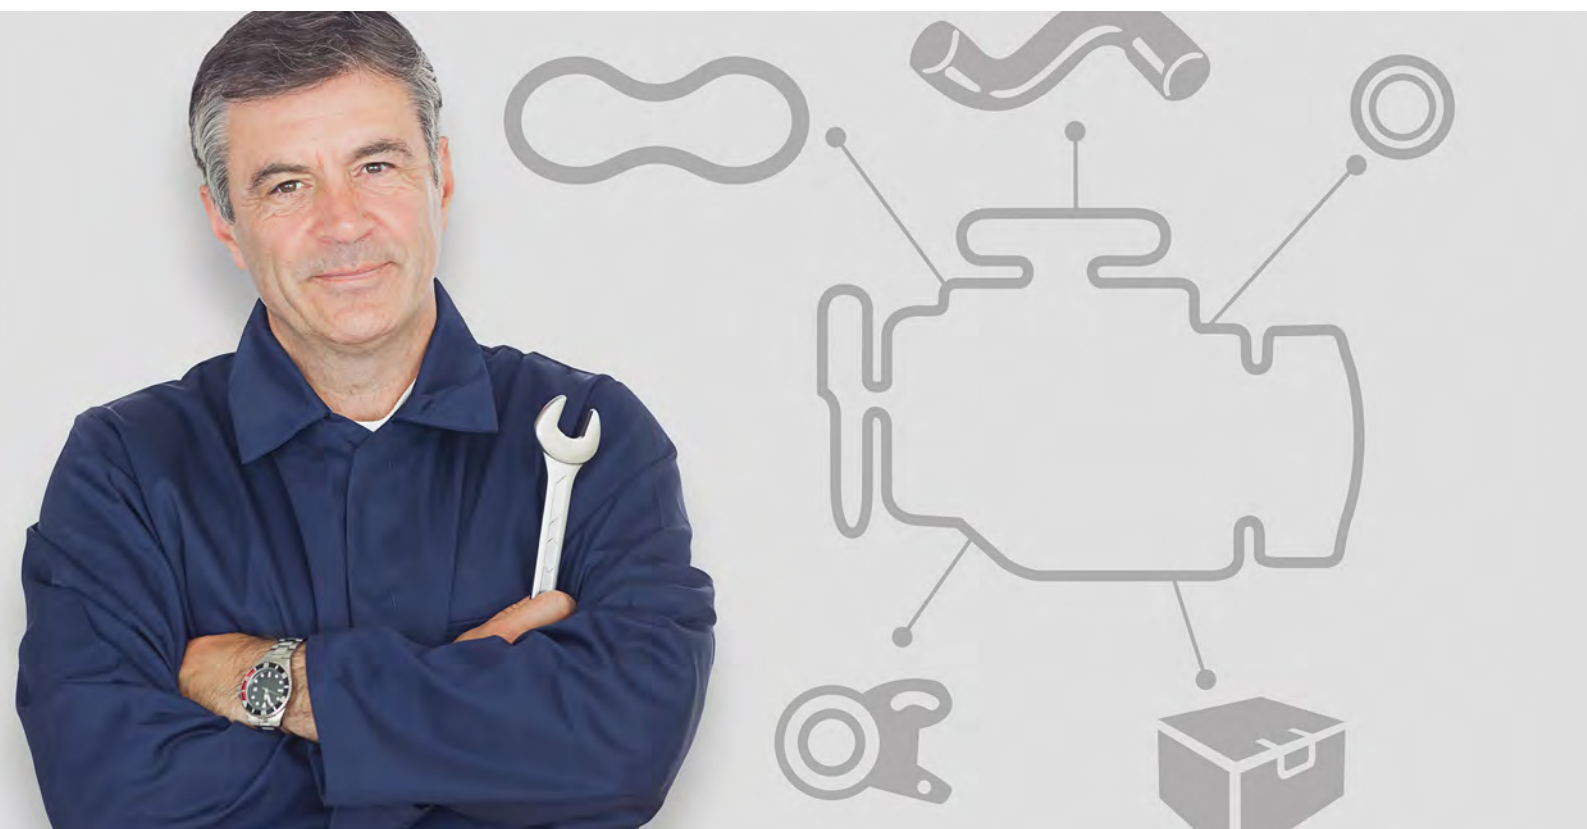

Connectors for fuel line, windshield washer hose and vacuum tubing: available separate or in a kit

Heater hose connectors: available separate or in a kit

TECHNICAL SUPPORT

At Gates you never buy just a product. Our Extra Service range is backed by professional technical support and advice. Gates Technical Support team offers technical training on belt drive system parts customised for heavy-duty applications. The main focus of the training sessions is on identifying belt and metal wear patterns in order to avoid premature failure and unexpected breakdowns. Because Iveco has Stretch Fit® applications in its range, technical information about Stretch Fit® belts and the ensuing installation issues also get the necessary attention.

Gates Extra Service product range offers you

- › A complete and versatile range of belt drive system, cooling system, fuel system and air system products for heavy commercial vehicles
- › Trouble-free and reliable service to minimise operating costs per kilometre
- › Replacement products in original equipment quality
- › Up-to-date application data
