

Blue Print Top Tip

Chrysler PT Cruiser Thermostat Housing Replacement

Applicable References: ADA109212

Applications: Chrysler PT Cruiser 2.0i, 2.4i 2000>

Date Issued: 03/2011

The thermostat housing/coolant filler neck is a plastic moulded item (located towards the OSF of the engine compartment) that can often warp or crack from thermal expansion and contraction.

Replacement is the only option for a long-lasting repair, and it is considered good practice to renew the thermostat and gasket (**ADA109210C**) at the same time as there would be no additional labour involved.

No specialist tools are required for changing the thermostat or housing.

Unlike the main dealer, Blue Print offers a 3 Year unlimited mileage warranty on every part, meaning peace of mind for the vehicle owner knowing that they won't need to pay for the same repair anytime soon.

The Thermostat Housing is also referred to as -

- Filler Neck and Thermostat Housing
- Thermostat Housing Cover
