Nissens[®]
DELIVERING THE DIFFERENCE

Today, Nissens' oil cooler range is based on 100 complete parts covering more than 300 OE numbers and 2,800 car makes and models. Furthermore, Nissens offers a standard HP/NO oil cooler range of 100 part numbers.

Nissens' oil cooler range is dedicated to the most popular cars, vans and trucks. The table below presents a selection of the new oil coolers added to Nissens' product range.

	MODEL		O.E.	<i>Nissens</i>
AUDI / SEAT / SKODA / VW	A 3/S3 / A4/S4 / A6/A6 / ALHAMBRA/LEON/OCTAVIA/GOLF IV/ PASSAT (98-)	1.9 TDI / 2.4 / 3.0	028 117 021E	90652

Why Nissens' Oil Coolers?

The Widest Product Range

To offer the widest range to all our customers and to meet the needs and demands in the aftermarket, we thoroughly investigate the car parks in all the important markets and constantly develop our product range accordingly.

As an engine cooling specialist, it is only natural for Nissens to expand our oil cooler range in order to meet the growing need for this specific product in the IAM.

In-house test facilities

All Nissens' oil coolers are designed and manufactured 100% according to the OE requirements. Nissens' oil coolers are tested in Nissens' advanced in-house test facilities to ensure

that they comply with the high quality demands – thus promising a long service life.

The development process includes an in-house test series where the oil coolers are pressure impulse tested with 100,000 impulses at a pressure of up to 10.0 bars – all to test their resistance to pressure vibrations. Moreover, the coolers are thermal expansion tested to examine their resistance to temperatures fluctuations from 10 to 90 °C.

High-quality packaging

All Nissens' oil coolers are packed in our compact and elegant box design. The solid packing system minimises possible risks of transport and storage damages to the products and, furthermore, the Nissens box optimises logistics costs and protects the environment.
