

Blue Print Bulletin

Toyota Brake Hose Applications

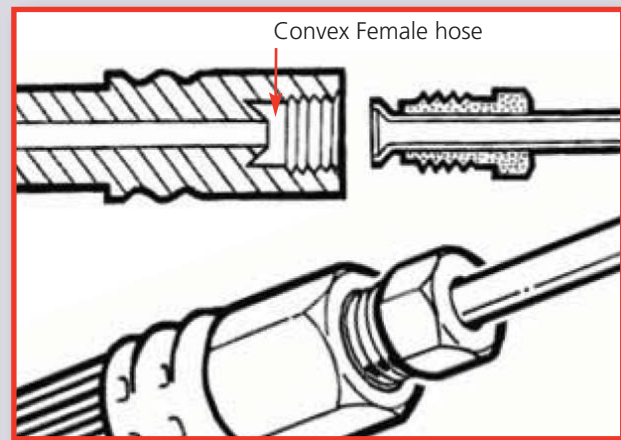

Date Issued: 01/05/03

Please note that on some Toyota brake hose applications a choice of brake hose types will be given. The difference is in the female connection 'seat' where one is concave and the other is convex. Blue Print will catalogue this choice as **Version A** or **Version B** and it is essential that the type is correctly identified before fitment.

Please use the following diagrams to identify the hose type on your vehicle

Version A

Version B

Version A - Concave Female hose connection to accept a convex pipe flange

Version B - Convex Female hose connection to accept a concave flared pipe.
