Attention! New timing chain kit

A complete repair can be carried out without delay with the new timing chain kit febi 102423. All the necessary parts, such as the housing seal with matching seal ring for the crankshaft, are included.

Timing chains and all other associated components from febi bilstein are manufactured according to the specifications and standards of the original equipment manufacturers to ensure a perfect fit and long service life. The range only includes parts which meet or even exceed the approval requirements.

Within the engine control range, febi offers a wide assortment of timing chain kits in addition to individual components. These kits contain all the individual parts needed for a professional replacement. In addition to the timing chains, they also include sprockets, chain tensioners, clamping rails, guide rails and chain guides.

febi timing chain kits are characterised by the following properties:

- Durability
- Precise fit
- Strict quality standards
- Meet the requirements of vehicle manufacturers
