

New varistor in the solenoid valve

Background

The operating life of the coil in the solenoid valves has been too short. Therefore an improved varistor has been introduced. The varistor is a voltage dependent resistor. It is cast into the coil to dampen voltage peaks.

Modification

A new varistor has been introduced on all standard solenoid valves. The new solenoid valves are introduced into production from the following chassis numbers inclusive:

| | |
|--------------------|-----------|
| Scania Södertälje | 1 241 510 |
| Scania Zwolle | 4 396 420 |
| Scania Angers | 9 034 655 |
| Scania Katrineholm | 1 833 542 |

Solenoid valve

Parts

| Designation | Discontinued P/N | New P/N |
|----------------|------------------|-----------|
| Solenoid valve | 1 340 231 | 1 421 322 |
| Solenoid valve | 1 340 232 | 1 421 323 |
| Solenoid valve | 1 370 353 | 1 421 324 |
| Solenoid valve | 1 370 354 | 1 421 325 |
| Solenoid valve | 1 393 580 | 1 421 326 |
